

DISTRIBUTION OF FLYERS

The board recognizes that organizations may want to distribute materials in the school district that are non-curricular but that have social, recreational or educational value. Any group wishing to distribute informational material must first submit, to the superintendent or a designee, a copy of the material and a completed Flyer Distribution Approval Form. Informational materials to be distributed must meet certain standards prior to distribution. The primary purpose of the standards is to prevent the exploitation of our students by individuals or groups. It is the responsibility of the superintendent to draft procedures regarding this policy.
